tresco lighting

JSI Cabinetry Lighting

Why Tresco

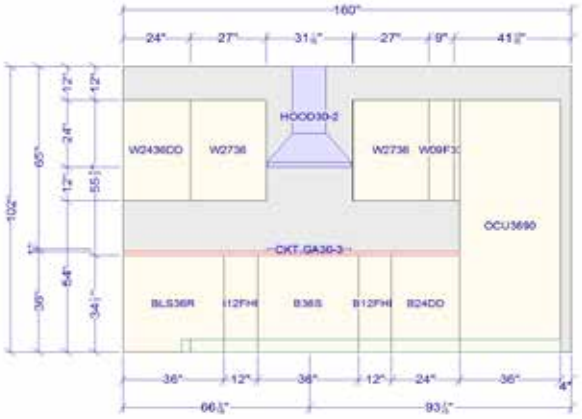
Enhance the appearance and functionality of your cabinets with energy efficient, long-lasting LED fixtures from Tresco Lighting by Rev-A-Shelf®, the innovative leader in cabinet lighting for over 25 years. LED lighting is one of the hottest accessories right now. We've taken over 40 years of experience in Kitchen and Bath and applied it to lighting. Our system is easy as 1-2-3.

We understand cabinet lighting can be overwhelming. We've made it easy. Our lights just fit! Match the cabinet size to the same size light. Everything is included. Our neutral color temperature works in all applications, and everything is controlled with our easy to install wireless wall dimmers.

We Make Lighting Easy

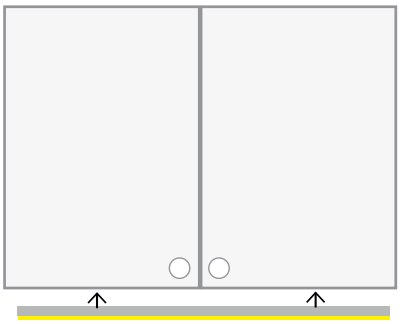
1. Design

Match the cabinet size to the light size.
Example: Wall 3030 uses UCL30 light.



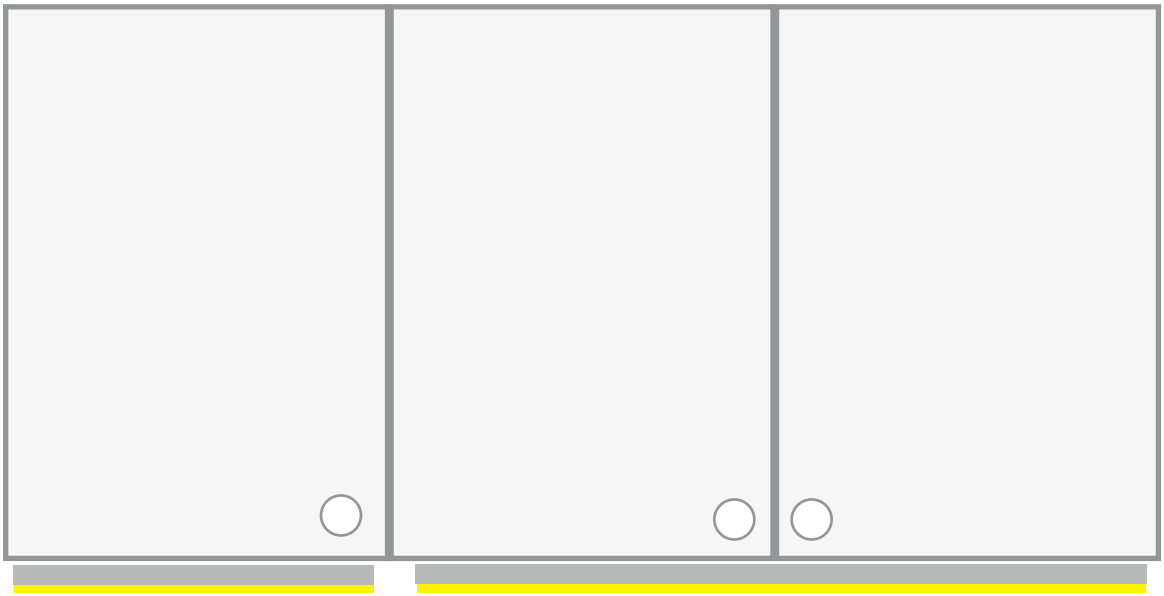
2. Installation

Optional Factory Installation by JSI



3. Beautification

Select Under Cabinet Lights

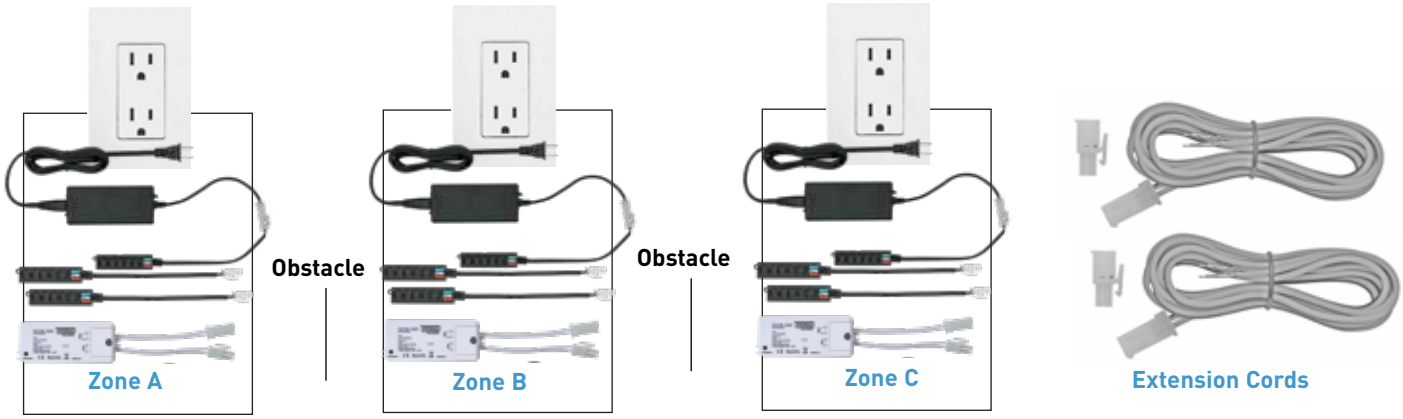


Sized Perfectly

Our aluminum Infinex lights are sized specifically to fit your cabinets. One light per cabinet, no more dark spots. Lights mounted behind face frame towards front of the cabinet will produce the greatest light spread.

Select Power Kit

Add one Power Kit for each zone. Extra Mounting Blocks and Extension Cords are available.



Select Dimmer Switches

Choose one or more dimmer switches. Conveniently mounts to wall plates or metallic appliances.

Installation

JSI FACTORY INSTALLATION AVAILABLE!*

Cabinet Size on Box

Our cabinet specific light kits are labeled according to the wall cabinet they are designed for. A wall 1830 cabinet will use a UCL18 light. Installers immediately know which light goes with each cabinet. Don't want to install lights? JSI will install them for you!*

*JSI factory installation available for extra charge. Installation includes mounting of light to cabinet and running starter cord through interior to the top of the cabinet.

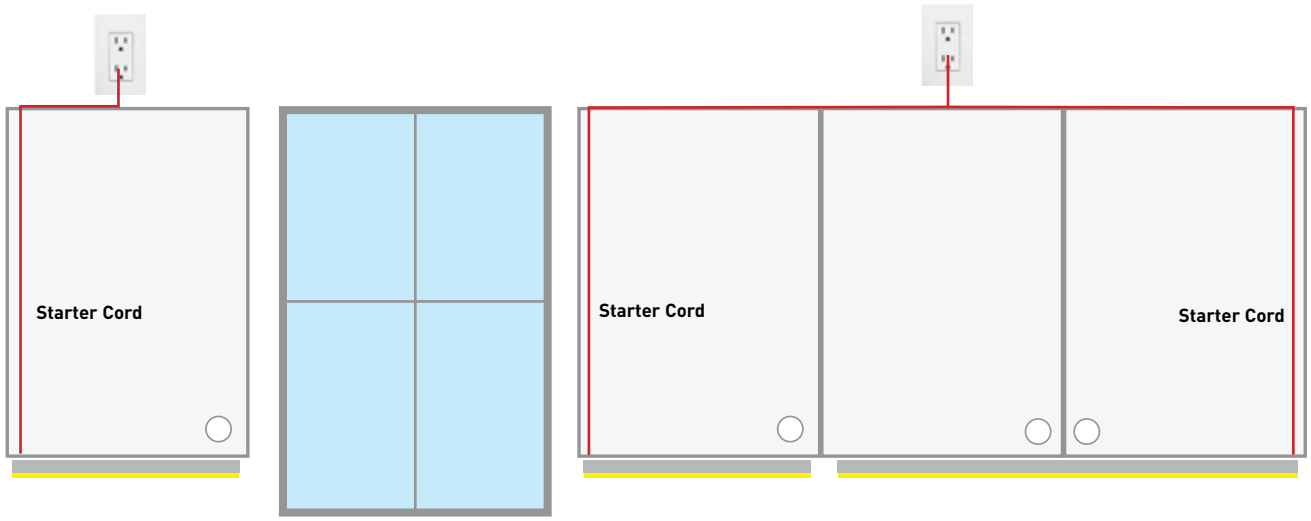
3M VHB™

Easy Mount to Cabinet

Our light kits adhere to your cabinets with 3M VHB Tape.

Starter Cords

Our cabinet specific light kits each feature a 79" pre-attached starter cord to make installation simple. Installers will never be short of what they need, when they need it.



Power Supply

FREEDiM Wireless Receiver

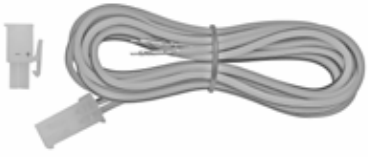
6 Port Mounting Block

Extra 6 Port Mounting Blocks

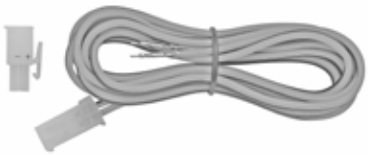
Power Kit

Our power kit includes the following:

- (1) 60 watt power supply w/ 6 port mounting block
- (2) extra 6 port mounting blocks
- (1) FREEDiM wireless receiver
- (2) 96" Extension Cords



Extension Cords



This will run up to 20' of custom Infinex under cabinet lighting and there are mounting ports for up to 16 cabinets.

Dimmer Switches

Our Freedim Wireless dimmer switches are available as a Deco Wall Dimmer and a Micro Dimmer. Both enables control of under cabinet lighting in one small wireless dimming switch.

Deco Wall Dimmers

Micro Dimmers

Deco Wall Dimmers

Our deco wall dimmers install in standard wall boxes and are completely wireless for hassle-free installation. Each remote is easily removable for convenient battery replacement.

Simply add a decorative cover plate.

Micro Dimmers

Our micro dimmers feature an integrated magnet for mounting to appliances or other metallic surfaces.

Why Infinex?

Infinex is the innovative, patented, LED aluminum extrusion system by Tresco Lighting. Designed by our in-house engineers and made in the USA, Infinex carries a UL safety certification and is available in multiple profiles with an array of installation options.

US PATENT NO: D783,533 and 9,618,194

The aluminum extrusion acts as a heat sink to extend the life of the LEDs.

The diffuser blends the diodes so you don't see the dots and protects the diodes from dust.

Under Cabinet Lights

Cabinet Size	Length of Infinex light	Cabinet width	Extrusion	Color temp N=3500	Qty of lights	Part number
W-9	7"	9"	REC	N	1	UCL9
W-12	10"	12"	REC	N	1	UCL12
