You will need to download the latest release of Autocad and install it to your computer. Open the program and activate it. Click on Import. Select a file to import. Output - Hello! So we're going to do a cupcake recipe. It's for a dog. We're going to use a blueberry cupcake mix. It says here to bake them at 350 degrees Fahrenheit. Now I'm just going to put the cupcakes on a cooling rack right over the cake circle that's on the counter. And I'm going to cover them up. Now we're going to take these cupcakes out of the oven. I'm going to go ahead and turn the oven on to 350. I'm going to bake them for about 20 minutes, not more. We don't want them burnt. And now I'm going to go ahead and test them out. A couple of you guys might be able to see the texture of the top of the cupcake. You know if it has little peaks. If that's what you're looking for, you can do that. But I think I like it a little more flat. So I'm going to go ahead and let them cool. So they're done, the cake is
