If you are sharing important information with others on the internet and want to keep it away from prying eyes, you have the option of encrypting your messages using one of the numerous available algorithms. The classic Cardan grille method relies on a sheet of paper or thin metal with multiple rectangular cutouts that reveal a hidden message when placed over a large body of text. It has seen widespread use throughout history, and this application allows you to take advantage of the same encryption algorithm on your PC. Nifty application that demonstrates the process and can encrypt messages The program is very easy to use, as you only need to insert the source text and define the size of the grille. A short animation illustrates the operation, and you are then provided with the cryptogram and the decryption key. Of course, you can copy the generated encryption key and offer it to anyone who wishes to decrypt your message. The utility is in no way complex, and it also comes with a decent amount of documentation that provides more detailed explanations. Lightweight and fully portable utility Cardan grille is a very small application and can be deployed in no time at all, as it is not necessary to install it on you PC beforehand. Moreover, you can carry it on a USB drive and launch it instantly on any computer that meets the listed requirements. Useful application that would benefit from an alternative operating mode While watching the encryption process is certainly interesting, it would be nice if you had the option of disabling the illustration altogether. However, it is possible to increase the animation speed until the operation is performed almost instantly. Overall, Cardan grille is a simple program that enables you to encrypt text and decode

## Cardan Grille PC/Windows

Cardan grille is a simple and easy to use application that enables you to encrypt text and decrypt cryptograms using a decryption key. It uses a secret word and a grille created using a rectangular pattern of cutouts in order to perform the encryption. The program creates the pattern and displays the generated animation while encrypting a message. It can be run without installation, so you can carry it around with you on a USB drive and boot it on any computer that meets the minimum requirements. It uses the same encryption algorithm as the printable card grille, so it is recommended to read about this method for beginners before using it. The del.icio.us application is a convenient bookmarking tool that enables you to store and organize links that you find on the web. This small utility also allows you to read and share web pages that interest you and can function as a stop and search engine of sorts. The application is extremely easy to use, as you just need to enter the URL of the web page and start browsing your favorites. Neat application that is almost indispensable Once the page is loaded, you can save it to your del.icio.us account and tag it. These tags can then be used to filter and organize your favorites as you like. Moreover, you can perform searches for web pages that contain a specific tag and read through them. It is great to be able to search for specific web pages with a specific topic and tag them. It is also nice that the app displays a list of the most popular tags, so you can easily access your most used links from the start. Undoubtedly, the del.icio.us application is a handy tool that has the potential to make browsing the web easier and more organized. The application is very small and lightweight, and you can carry it around with you on a USB drive and boot it on any PC without installing it beforehand. Storage service that requires additional registration Despite the fact that this is a handy bookmarking tool that can be used as a basic search engine, the del.icio.us service is also possible to use as a storage service. The service allows you to download any web page and store it locally so that you can access it at any time. In order to use this feature, you need to register for an account and define your preferences, as the application doesn't include any browser or toolbar to do this automatically. It is a fairly convenient feature that allows you to store favorite web
