I was in a band from the 80s called LANE. I was also in the Super-Norge band LE PATROUILLE DU QUE CLER. I have been designing and coding for about 15 years. I like Java-programming, programming languages such as LUA. I like visual-design, game-design and the concept of fun. I like to design games that have the most challenges for the player and I'm very pleased with the results. I am interested in board games, card games and role-playing games and I have learned a lot of game-design from some of the great video-games in these

▲ In a multilayered story told in fragments, the various thoughts of the characters intersect in the Lands Between. ▲ An epic drama born from a myth, an epic drama in which the various thoughts of the characters intersect in the Lands Between. ▲ A vast world, filled with so much to discover, where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. ▲ Unique online play that loosely connects you to others. ▲ An action RPG with a unique style with a compelling story and a huge, beautiful world. A new fantasy action RPG with the feel of a classic Action RPG, whose story, setting, and design are based on a myth of an imaginary fantasy world, inspired by the fabulous game The Legend of Zelda: A Link to the Past. The new fantasy action RPG. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. • A Vast World Full of Excitement The game takes place in the world of the Lands Between, which is a flat expanse between the Archael and legendary Elden, and has various different types of landscapes. The game's fictitious world exists between two parallel worlds. The lands to the west of the Archael (excluding Shurima and Leyfi) are filled with magic and technology, which flow together in a chaotic fashion. The lands to the east of the Archael are ridden with lush trees and plains, and the lands between the Archael and Elden are a mixture of them all. The game's world is filled with surprises. Although the game's world is huge, you can move at high speed between many places and no two worlds are alike. Sometimes villages, castles, towns, townships, and mountains lie in the same place. Sometimes, dungeons or bridges appear from nowhere, and the dozens of villages and townships scattered around exist in several different shapes and sizes. You are free to explore the game's vast world. However, unlike a video game, the actions you take and the results change the world itself, and the game uses a special method to simulate this. In order to be able to properly simulate this, the game's developers implemented a unique method called the "Content Locking Method." • Create your Own Character The game allows you to freely choose your character's height bff6bb2d33
