An ethical puzzle-adventure game where you are a detective following four questions: "who, what, when, and why". The game is a kind of detective detective video game designed to solve puzzles by playing the three roles of detective, coroner, and judge. You must perform interviews and clues to detect a suspect while observing other cases. Not only is the game hard, it's also really fun. How To Play: At the beginning of the game, the four questions are displayed in the detective. If the player encounters the Blue Label (wanted person), the private detective is required to interview him. The method of questioning the suspect is the same. When the detective finishes his work, the case will be labeled "CLUE" If the detective's work satisfies the four questions, he will become a judge, and the case is required to answer the questions. When he answers the questions, the case is labeled "TEST" When the case is "CLUE", the case will be labeled "SUSPICION" or "DETECTED". When the case is "TEST", the case will be labeled "QUESTION" or "UNDETECTED". When the case is "DETECTED", the game will end. When the case is "UNDETECTED", the game will continue. When the detective encounters the Gold Label (a victim), he must find the clues. The method of interrogation will be the same as the Blue Label. When the detective finds the clues to solve the murder, he will become a coroner, and his case will be labeled "CORPSE". When the detective has finished his work, the case will be labeled "VICTIM" After the murder, the detective must answer the four questions in order to return to the entrance. If the detective answers the questions correctly, the game will end. If the detective can not answer the questions correctly, the detective will follow the same path. You can also change the game difficulty. Help your friend in the operation of the game! Please support the game!
