Space Whale is an action adventure game combining hardcore roguelike gameplay with procedurally-generated spaceships, exploration, and highly memorable story and characters. Explore a universe full of strange and dangerous creatures, magic and great danger, and immerse yourself in an immersive story. It's the year 2230, and the last remnants of mankind have been living on the space whales for the past 30 years. Finally, we are on the brink of the end of the whales, and everyone has to make a choice: stay and fight for your survival, or die trying to escape and live the next 30 years alone... Choices matter. Back to top

Key Features: Roguelike, Permadeath, Hardcore: Space Whale is a roguelike with procedurally-generated encounters and maps. While you always start with a certain amount of life, every action will have consequences that affect your survival, health and loot. The action and combat are for the most part turn-based, but a lot of enemies can only be defeated with melee combat, forcing you to pause to plan carefully which weapon to use.

Unique 2D Graphics: Space Whale's art direction was influenced by retro games, and the 2D graphics are very reminiscent of the games from the '80s. The story is told through gorgeous hand-drawn pixel art, accompanied by powerful sound effects and full-voice cast.

Hand-written Story: The story unfolds through your own encounters with the space whales' inhabitants. In the beginning you will be just one of many strangers, but as your character evolves into a hardened survivor, your actions will begin to affect your own survival. You can join up with a tribe at various stages of their journey, and change the course of the story as you see fit.

Visually-Compatible Gamepad: Space Whale is fully playable with a gamepad! The actions are usually turn-based, but the distance you need to move before attacking, and the precision with which you need to attack, make it a bit more difficult to play on the comfort of a gamepad. For the more veteran players, the controls will feel familiar from the likes of Diablo. Space Whale is also fully playable with keyboard and mouse!

Community and Discord Support: The game is being actively developed by a small team, and we would love to get feedback on the game through comments and various online forums. We also offer a Discord server where you can meet c9d1549cdd

What's new in Unsung Warriors - Prologue:

Necrolance is a "black metal" band from Germany, formed in 1988. They were from the late 1990s to the early 2000s considered a key influence in the second wave of black metal, rooted in Viking mythology. After their initial live shows, Necrolance became strongly associated with the Ravenshadow label. Like several prominent early black metal bands, they also recorded for the Mystic Records label. The band recorded six albums, the first four of which were released by Ravenshadow. The fifth is double disc split release with Arkhon Infaustus, and their sixth and latest album A Game of Thrones () was released in 2011. Necrolance had released a few unsigned bootlegs before signing with Ravenshadow. Necrolance broke up in 2011. After a long hiatus, Necrolance reformed in 2014; they have released six LPs and live shows since. History Formed in 1988 in Nuremberg, the band recorded several early demos, before going on the demo and "Freak of the Invisible World" single in 1992, already signed with Simon Erikstrup of the Ravenshadow label. The band is said to have inspired many later black metal bands. Welcome to SchoolRoom Escape. You find yourself stuck in a school classroom, you and your friends try to escape by solving puzzles and finding the correct answers. To escape the classroom, you will have to inspect, interact, combine, and interpret objects to obtain clues to solve new puzzles. If a student has not solved a puzzle correctly, then all other students will not receive their next clue. Your main goal is to work with your teammates to gain enough information in order to escape together. Even though you are exploring the classroom, avoid touching or hitting the walls, floors, doors, windows or any other in-game objects as that will stop the student from receiving his/her next clue. The first one to escape the classroom is the winner. You can play this game solo or cooperatively. You and your friends will have one life time. You can see the health bars of your teammates

on the left side of the screen. If any one of your teammates dies, it will end the game. About the Puzzles: You are in a classroom where there are all kinds of things to discover. The puzzles are generally quite intuitive, but sometimes the solution of a puzzle can take longer than the game time for a single level. Multiplayer Co-op mode: Fully cooperated fun The rules are simple. Two teams have to work together to solve all the puzzles. If a student misses a puzzle on one team, the other team does not get its clue. The first team that solves all puzzles is the winner. About the hint system: The hint system in the game is very simple. The hint levels go as follows: * 0 hints: no hint. * 1 hint: a hint. You can tap it. * 2 hints: a hint. You can tap it. * 3 hints: you can tap it. * 4 hints: a hint. You can tap it. A hint can change the puzzle before your eyes. Help button: You can pause the game anytime in the middle of a puzzle. You can press the menu button. That's it. That's all. Credits: Title theme "School" MUSIC ONLY - Mutation
